BESPOKE SOLUTIONS

Our rail drills are adapted to suit whatever rail form you need. We have most of the common rail forms on file, plus our design team can accommodate any specific requests.

HOLE CENTRE LOCATOR

- Used for the correct measurements for fish plates, S&T, bonding holes and axle counters.
- All rail forms and spacings can be catered for and our designers will be able to deal with any special requests.

MULTIFORM TEMPLATES

- Multiform templates are a fast, easy and accurate system, to ensure drilling at the correct height.
- Two rail profiles are allowed per template, giving you flexibility to use on a multitude of rail.

TRAM ADAPTOR

- The Rhino 4 and Rhino E are both adaptable for drilling tram rail. The tram adaptor kit elongates the rail clamp to fit over wider rails.
- With a number of different templates, we can support most common types of tram rail requirements.
- Our design team are also able to design to your specific requirements.
